Subject: New Technipaq Website Announcement

Technipaq, Inc. is proud to announce the launch of our new website. The new website has been redesigned to provide enhanced navigation and expanded access to information about Technipaq's product lines and capabilities.

Technipaq is an ISO 9001/13485 certified manufacturer of flexible sterilizable packaging materials for the medical device, diagnostic, pharmaceutical, and other industries. Located in Crystal Lake, IL, Technipaq's 60,000 sq. ft. manufacturing facility handles laminating, slitting, sheeting, die-cutting, fabricating, and flexographic printing of pouches, lids and rollstock produced in a variety of sizes from foil, film, Tyvek® and paper laminates.

In addition to maintaining stock sizes of pouches and bags for immediate shipment, Technipaq produces custom sizes and configurations of pouches and bags in large or small runs, printed up to 8 colors or plain. All Technipaq materials are also available in rollstock.

For further information about Technipaq, visit the new website at www.technipaq.com
